WHAT THE RECORD SHOWS

- 4,401 MW of the 5,993 MW filed here withdrew.
- The largest request filed here, 1,176 MW (solar + battery), was filed in 2021 and is still active.
- Eleven requests were filed on 2023-04-17; 10 withdrew and 1 remains active.
- None of the 11 withdrawals came within a year of filing; the quickest took 1.6 years.

This is a reading of a public dataset, not a customer case study: no engagement, customer or client is involved. The dataset records outcomes — what was built, what withdrew, and when — but not why any project withdrew, so no cause is attributed here. Nothing on this page claims GridVision predicted, influenced or would have changed any outcome, and a pattern at one point of interconnection does not generalise to another.
