WHAT THE RECORD SHOWS

- 856 MW of the 856 MW filed here reached commercial operation.
- Completions here took between 4.2 and 4.4 years from request to commercial operation (median 4.2).
- The largest request filed here, 373 MW (wind), reached operation 4.2 years after filing.
- Two requests were filed on 2018-01-04; all of them reached operation.

This is a reading of a public dataset, not a customer case study: no engagement, customer or client is involved. The dataset records outcomes — what was built, what withdrew, and when — but not why any project withdrew, so no cause is attributed here. Nothing on this page claims GridVision predicted, influenced or would have changed any outcome, and a pattern at one point of interconnection does not generalise to another.
