Long Draw 138 kV: interconnection queue history

Three of five requests reached commercial operation.

Five interconnection requests since 2016: 3 reached commercial operation and 2 withdrew.

REQUESTS	BUILT	WITHDRAWN	STILL IN QUEUE	MEDIAN YEARS
5	3	2	0	2.8

THE QUEUE RECORD (SOURCE ROWS)

Requested	Project	Technology	MW	Outcome	Dated
2016-12-14	Long Draw Solar	Solar	226.73	Built	2021-12-14
2018-08-13	Juno Solar (Phase I)	Solar	166.12	Built	2021-05-26
2018-08-13	Juno Storage	Other	495	Withdrawn	2019-06-10
2022-05-09	BoCo BESS	Other	155.48	Built	2024-08-12
2022-11-14	JUNO BESS	Other	355.21	Withdrawn	2023-08-17

WHAT THE RECORD SHOWS

- 850 MW of the 1,399 MW filed here withdrew, and 548 MW reached commercial operation.
- Completions here took between 2.3 and 5.0 years from request to commercial operation (median 2.8).
- The largest request filed here, 495 MW (other), withdrew 0.8 years after filing.
- Two requests were filed on 2018-08-13; 1 reached operation and 1 withdrew.

This is a reading of a public dataset, not a customer case study: no engagement, customer or client is involved. The dataset records outcomes — what was built, what withdrew, and when — but not why any project withdrew, so no cause is attributed here. Nothing on this page claims GridVision predicted, influenced or would have changed any outcome, and a pattern at one point of interconnection does not generalise to another.
