Pomelo 345 kV: interconnection queue history

Two of four requests withdrew; one reached operation.

Four interconnection requests since 2017: 1 reached commercial operation, 2 withdrew, and 1 remains active.

REQUESTS	BUILT	WITHDRAWN	STILL IN QUEUE	MEDIAN YEARS
4	1	2	1	2.8

THE QUEUE RECORD (SOURCE ROWS)

Requested	Project	Technology	MW	Outcome	Dated
2017-04-11	Monte Cristo II Wind	Wind	233.9	In queue	—
2017-09-21	La Joya I Wind	Wind	236.9	Withdrawn	2021-03-19
2017-09-21	La Joya II Wind	Wind	236.9	Withdrawn	2021-03-19
2021-09-02	Anemoi Energy Storage	Other	205	Built	2024-06-11

WHAT THE RECORD SHOWS

- 474 MW of the 913 MW filed here withdrew, and 205 MW reached commercial operation.
- The one request that reached operation took 2.8 years from request to commercial operation.
- The largest request filed here, 237 MW (wind), withdrew 3.5 years after filing.
- Two requests were filed on 2017-09-21; all of them withdrew.

This is a reading of a public dataset, not a customer case study: no engagement, customer or client is involved. The dataset records outcomes — what was built, what withdrew, and when — but not why any project withdrew, so no cause is attributed here. Nothing on this page claims GridVision predicted, influenced or would have changed any outcome, and a pattern at one point of interconnection does not generalise to another.
