WHAT THIS PAGE READS

This page reads 6 dataset rows at every 345 kV point of interconnection the dataset places in St. Joseph or LaPorte County, Indiana, in MISO (NIPSCO territory: Stillwell 345 kV, the Babcock–Stillwell 345 kV line and the Burr Oak–Schahfer 345 kV line), recorded under five point-of-interconnection names. No single NIPSCO 345 kV point in these two counties has enough requests for a page of its own, so they are read together.
